Special Notices. B. A. FAHNESTOCK'S VERMIFUGE.

It is now over forty years since this medicine was offered as a remedy for Worms, and from that time its reputation has steadily increased until at the prescut day it is almost universally acknowledged throughout nearly all parts of the world to be the sovereign remedy. Worm Confections, made more for the purpose of pleasing the painte than of overcoming the disease, have been manufactured all over the country; but their short lease of life is nearly exhainted, and B. A. Fahnestock a Vermifuge continues to grow in favor daily. Children often look pale and sickly from no other cause than worms, and spansh are most frequently the result of those hidden sappers and miners.

When they are irritable and giverish, sometimes craving food and eating ravenously, again refusing wholesome diet, tossing restlessly in sleep, meaning and grinding the teeth, then be assured these symptoms are indications of worms.

Uneasiness and pain in the abdomen, with swell-

Uneasiness and pain in the abdomen, with swelling and hardness, are generally attendant upon the presence of these hidden sappers and miners.

A gradual wasting away or emaciation of the fiesh is one of the most common attendants upon worms. They absorb the animal juices, and destroy the nourishment imparted to the stomach by wholesome diet, thereby occasioning a variable appetite and z strong desire for indigestible food.

The stomach has, undoubtedly, a very great synpathy with other parts of the body. This is the case with respect to the irritation produced by worms, especially those existing in the stomach itself. They give rise to many other diseases; and patients often suffer incredibly without being aware of the cause.

of the cause.

"Many a helpless child has been laid in the grave, "Rany a helpless child has been laid in the grave, when the disease which caused its death has been outrely misunderstood, and when worms have really been the cause. It has been proved beyond cavil that worms exist in the human system from earliest infancy, therefore parents—especially mothers, who are more constantly with their children, cannot be too observing of the first symptome of worms, for so surely as they exist, can they be safely and specially removed from the most deticate infant, by the timely use of B. A. Fahnestock's Vermifuge.

Physicians do not hesitate to recommend it and

Physicians do not hesitate to recommend it and use it in their practice, and many of the most eminent of the profession, from all parts of the country, testify to its uniform success. In fact, it never fails. It has frequently been given to children as a safe purgative, not suspecting the cause of the illness, and large quantities of worms were discharged and immediate relief afforded.

Great caution must be used by every purchaser, to be his own judge in one sense, and to examine every bottle he buys of it. The simple name of RAMARSTOCK is not sufficient. He must look closely and carefully to see that the initials are B. A FAMARSTOCK, and be satisfied with nothing close.
